

Instructions for Poster Presentation

【Registration】

Advance registration is required.

Please register for the symposium via the registration form on the PIM website. When registering, select the "Participation Style: Poster Presentation" checkbox. If you do not check this option, you will not be able to present a poster. All symposium participants are welcome to attend the poster session. Since the primary goal of the poster session is to facilitate discussion, previously published data is acceptable.

Please send your abstract (Word file) to pim2026@pim-sympo.jp. The subject line should be "[Abstract] Your Name". Note that if your abstract is submitted after the deadline, it will not be included in the abstract book.

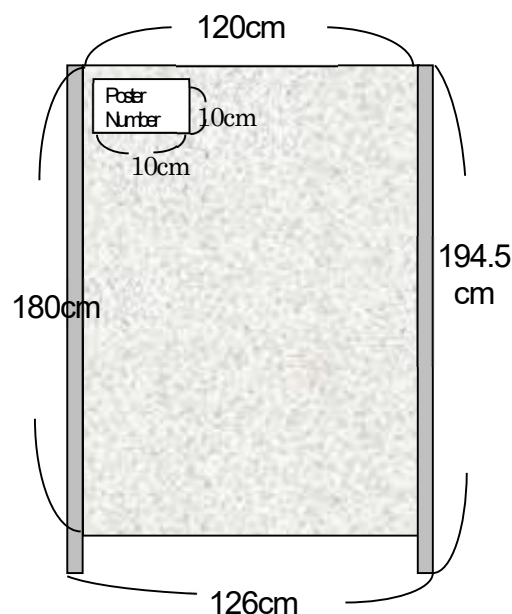

【Poster】

After we have received all the abstracts, we will inform you of your poster number. Please display your poster on the board with your poster number.

Posters should be no larger than 180 cm (H) x 120 cm (W) and must be in English.

Pushpins to attach the poster will be provided.

There is no need to submit your poster in advance. Please bring your poster and remove it by yourself. If you cannot do that, let us know in advance.

【Abstract】

Please write your abstract using the specified format (Microsoft Word) and submit it. When writing your abstract, be sure to read the precautions listed in the format.

You can use colored text, but you cannot insert figures.

Please use special characters and italics so that they are easy to understand, and add comments as necessary.
