

# PIM & PRiME Poster Presentation

Poster No.	Name	Title
<b>P-01</b>	Benedicta Obenewaa Dankyi	IgG and IgM Responses to PfEMP1 Domains Associated with Semi-immunity to Clinical Malaria in Burkinabe Children Under Five
<b>P-02</b>	Pinyapat Kongngen	A Human Hepatocyte Platform for advancing Antimalarial Drug and Vaccine development Against Pre-erythrocytic stage of <i>Plasmodium vivax</i>
<b>P-03</b>	Tuyet-Kha Nguyen	Development and characterization of human monoclonal antibodies against <i>Plasmodium vivax</i> blood-stage antigens
<b>P-04</b>	Huai Chuang	Inhibition of SICA-HUVEC Surface Expression in <i>Plasmodium knowlesi</i> by Brefeldin A and Torin 2
<b>P-05</b>	Miako Sakaguchi	Binding analysis of SICA-HUVEC domains in <i>Plasmodium knowlesi</i> by Cell ELISA
<b>P-06</b>	Chukwuma Stephen EZENWANNE	<i>Plasmodium knowlesi</i> Rosette Related Protein 1 is associated with the formation of rosettes
<b>P-07</b>	Thant Zin Tun	Selective phospholipid binding by PH1 and its role in AMA1 translocation during <i>Plasmodium yoelii</i> erythrocyte invasion
<b>P-08</b>	Xueling Kuang	The effect of MEK1 inhibitors on proliferation of the malaria parasite
<b>P-09</b>	Thananya Jinato	Harnessing human tonsil organoids to evaluate vaccine-driven immune activation
<b>P-10</b>	Srisuda Keayarsa	D-glucose and fetal bovine serum supplementation support the erythrocytic stage development of <i>Plasmodium knowlesi</i> : <i>ex vivo</i>
<b>P-11</b>	Kongpope Chareonsuk	Mitochondrial DNA Copy Number in <i>Plasmodium falciparum</i> is Stage-Dependent
<b>P-12</b>	Junpei Fukumoto	Ultrastructural expansion microscopy enable for detailed protein visualization in human malaria parasites
<b>P-13</b>	Faridah Ousseini	A novel molecular assay for the identification of six <i>Plasmodium</i> species including <i>Plasmodium ovalecurtisi</i> and <i>Plasmodium ovalewallikeri</i>
<b>P-14</b>	Rojrung Rattanaporn	Detection of <i>Plasmodium</i> lactate dehydrogenase in a bead-based multiplex assay
<b>P-15</b>	Palakorn Chintanawiwat	Genetic Signatures of <i>Plasmodium vivax</i> Circumsporozoite Surface Protein During Malaria Resurgence in Thailand
<b>P-16</b>	Chayanut Suansomjit	Malaria Resurgence in Thailand I: Cross-Sectional Surveys
<b>P-17</b>	Kanit Phumchuea	Malaria Resurgence in Northwestern Thailand II: Passive Case Detection
<b>P-18</b>	Nichakan Inthitanon	Malaria care-seeking behaviors and infection prevalence among short-term Myanmar migrants in Thailand
<b>P-19</b>	Piyarat Sripoorote	Sociodemographic and behavioral determinants of <i>Plasmodium vivax</i> -specific antibody responses among short-term Myanmar migrants in Thailand
<b>P-20</b>	Nattawan Rachaphaew	Factors predicting parasitemia and gametocytemia among patients with <i>Plasmodium vivax</i> infection in Thailand
<b>P-21</b>	Chalermpon Kumpitak	Age-Associated Gene Expression Profiling in Malaria Vector Anopheles Mosquitoes
<b>P-22</b>	Pattamaporn Petchvijit	Molecular Identification and Species Composition of Anopheles Larvae in Malaria-Endemic Region of Thailand
<b>P-23</b>	Mayumi Tachibana	The ookinete crystalloid protein PH3 is involved in the crystalloid ultrastructure formation

<b>P-24</b>	Masahito Asada	<i>Babesia bovis</i> spherical body protein 3 is a crucial protein for ridge formation on infected red blood cells
<b>P-25</b>	Masaki Takeguchi	An attempt to identify non-TbHpHbR proteins that bind to anti-TbHpHbR polyclonal antibodies in <i>Trypanosoma brucei</i>
<b>P-26</b>	Qinaer Madingbieke	Toward the establishment of <i>Toxoplasma</i> mutator
<b>P-27</b>	Kana Fujihara	Development of Anti-CD5 VNAR Antibody for Targeted Nucleic Acid Delivery in T Cells
<b>P-28</b>	Maho Tanimoto	Development of VNAR Antibody-based Technology for Degradation of Target Membrane Proteins
<b>P-29</b>	Keisuke Konishi	Development of a Novel CRBN Modulator for Targeted Protein Degradation
<b>P-30</b>	Hikari Ozawa	Enzymatic Lipidation Enhances the Antimicrobial Activity of Peptides
<b>P-31</b>	Yoshiya Murata	The first step towards establishing prenyltransferase assay system in <i>Escherichia coli</i>
<b>P-32</b>	Hiroshi Sakai	Systematic Identification of Pax7 Transcriptional Coactivators
<b>P-33</b>	Satoru Otowa	Functional analysis of slow-twitch fibers in Sox6-deficient skeletal muscle
<b>P-34</b>	Mari Saida	Mitochondrial transfer from skeletal muscle to macrophages via extracellular vesicles
<b>P-35</b>	Masaya Nagano	Cryo-EM analysis of Axin2 homo-oligomer involved in the termination of the Wnt/ $\beta$ -catenin pathway
<b>P-36</b>	Yoshika Tanoue	Physiology of vacuolar accumulation of basic amino acids in budding yeast <i>Saccharomyces cerevisiae</i>
<b>P-37</b>	Wakaba Yagi	Regulation and physiology of yeast vacuolar amino acid transporter Avt3
<b>P-38</b>	Yoshihiko Kuchitsu	The contribution of human STING major variants into the inflammatory responses in model cells for diseases caused by STING constitutive activation
<b>P-39</b>	Noritaka Saeki	ER $\alpha$ signaling differentially modulates inflammatory and proliferative responses in lining and sub-lining synovial fibroblasts in an inflammatory arthritis
<b>P-40</b>	Masashi Takeda	Elucidating the function of androgen receptor in the heart
<b>P-41</b>	Yusuke Kojima	Exploring Novel Regulatory Mechanisms of Lipxygenases via Protein-Protein Interactions
<b>P-42</b>	Haruna Arai	Elucidation of the molecular mechanism of OPSIN3 in metastatic prostate cancer
<b>P-43</b>	Mie Kurata	Pathology-Based Optimization of Immunohistochemistry for Difficult-to-Detect Tumor Antigens: Addressing Unmet Needs in Precision Oncology
<b>P-44</b>	Riko Uehara	Cell-Free Multistep Gene Regulatory Cascades Using Eukaryotic ON-Riboswitches Responsive to in Situ Expressed Protein Ligands
<b>P-45</b>	Hajime Takahashi	Construction of eukaryotic artificial cell-based sensors for simultaneous detection of multiple analytes at ambient temperature
<b>P-46</b>	Hinako Fujisaki	Analysis of proximity cetuximab-induced EGFR interactome using AirID
<b>P-47</b>	Yuta Yanagihira	Identification of novel Dnmt1 interactors
<b>P-48</b>	Hamada Mana	Isolation and characterization of rabbit monoclonal antibodies suitable for proximity-dependent protein biotinylation analysis
<b>P-49</b>	Shun Shiraishi	Identification and functional analysis of host proteins that interact with EV-A71 protease and polymerase
